9 October 1975

MEMORANDUM FOR THE RECORD

SUBJECT: USIB

1. There was general agreement that the SWS Monthlies had evolved into a pretty good vehicle. Lew Allen probed fitfully as to whether or not there is a clear understanding within the Community as to who and what bodies are responsible for warning in its various gradations. The rather general answer from the Chairman was that the J-2s in the field must warn their commanders, Danny Graham here must warn the Chairman of JCS, the Service Intelligence Chiefs must warn their Chiefs of Staff, and the Director must warn the NSC. The SWS is one body to help the DCI in this regard, but he looks to the NIOs and the Community in general as well.

2. General Tighe indicated that more might be done to assure that the right people have access to the SWS Monthlies, and I asked PRD to take a look at the dissemination list and improve it as appropriate.

3. There was an infinite discussion on the Soviet paper, most of it metaphysical. Basic question being to what extent the Soviets might make further concessions in SALT deliberations and whether or not such concessions would be minor or major.

4. In Executive Session, the Director mentioned the availability of [ ] for the Security Committee job. The members asked for time to consider this and to make alternate nominations as they so choose. This was agreed.
